

**ABITA SPRINGS COMMUNITY MASTER PLAN**  
**ST TAMMANY PARISH, LOUISIANA**  
**CLIENT: ABITA SPRINGS TIMBER COMPANY**

Abita Springs Timber Company is charged with the vision of developing an 8000 acre (3200 hectare) new community that will aimed at providing future residents a place to work, live, attend school and play.

The Master Plan will shape the neighborhoods by accessible public spaces and community institutions; town centers, plazas and urban places to be framed by architecture and landscape design, with respect to local climate and building practice. This future community will have a discernible center as the heart of the community - that concentrates commercial activity, a place to purchase daily needs, goods and services.
